

Internet of Things

The background of the slide is a photograph of a modern university campus. It features several multi-story buildings with distinctive colorful facades in shades of yellow, green, and blue. The buildings are surrounded by lush green trees and a paved walkway where people can be seen walking. The sky is blue with some light clouds. The entire image is overlaid with a semi-transparent blue filter.

1. Question Sheets

1.1. Introduction

The recorded lecture is provided [here](#).

Ejercicio 1.1.1. What are the two views on IoT discussed in the lecture? How do they differ?

Ejercicio 1.1.2. Are IoT gateways always necessary? What are they used for?

1.2. IoT Systems

The recorded lecture is provided [here](#).

Ejercicio 1.2.1. What is the difference between an IoT system and an IoT platform? Use the WWW to find another IoT platform that is not mentioned in the lecture.

Ejercicio 1.2.2. Is the Microsoft Azure IoT Suite a horizontal or a vertical IoT platform? Why?

Ejercicio 1.2.3. Provide an example (i.e., search on the Internet or come up with your own idea) for a scenario in which you would use predictive data processing but not prescriptive data processing. What is the main legal difference between these?

Ejercicio 1.2.4. What are the differences between mesh-based and edge-based IoT systems? Which one is currently supported by platform providers?
